AKASH BANERJEE

Full-Stack Developer · AI Engineer · Product Builder

PROFILE

Full-stack developer and product builder from Kolkata, currently in the final semester of BCA at Parul University. Founder of Sky DigiAI Tech, working at the intersection of software engineering, AI, and design. I ship production-grade web products end-to-end — from schema and API to polished, brand-forward interfaces — and back it up with formal training in ethical hacking, cybersecurity, and agentic AI.

EXPERIENCE

Founder · Full-Stack Engineer

2024 — Present

Sky DigiAI Tech · self-founded

- Founded and operate Sky DigiAI Tech, delivering AI-first web products, brand systems and creative direction to clients end-to-end.
- Architect production apps with React / Next.js / TypeScript on the frontend and Node.js / PHP / Python + Supabase / PostgreSQL on the backend.
- Build agentic AI features using OpenAI, LangChain and RAG pipelines — integrating retrieval, tool-calling and multi-agent workflows.
- Own the full product loop: design in Figma, ship code, write copy, and direct the visual/motion language of every launch.

Independent Developer & Creative

2023 — Present

Freelance · Remote

- Ship full-stack websites, portals and internal tools for founders and creators — from landing pages to authenticated dashboards with realtime data.
- Produce original music as Mokshafia and direct visual content; blend engineering craft with brand storytelling.

HIGHLIGHTS

- Full-stack ownership: design, code, ship, market — comfortable across the whole product surface.
- Trained in offensive security (CEH-aligned) — writes code that assumes an attacker.
- Music producer as Mokshafia — visual and audio design translate directly into brand craft.
